

A Product Requirements Document (PRD) describes what the product is, why it exists, who will use it, and what features it should include.

Here's a professional PRD for your project.

Product Requirements Document (PRD)

Project Title

Smart TASMAL Consumer Regulation System Using Aadhaar-Based Verification

1. Project Overview

The Smart TASMAL Consumer Regulation System is a web-based platform designed to improve transparency, encourage responsible alcohol consumption, and support government monitoring of alcohol sales. The system verifies consumers using Aadhaar-based identity authentication, tracks alcohol purchases, allows users to set personal consumption limits, and provides analytics for administrators and healthcare authorities.

2. Problem Statement

Current TASMAL operations do not provide personalized consumption monitoring or a centralized system to regulate individual alcohol purchases. This can contribute to excessive alcohol consumption, underage purchase attempts, and limited visibility into public consumption trends.

3. Objectives

- Verify consumer identity.
- Ensure only eligible consumers can purchase alcohol.
- Allow consumers to set personal drinking limits.
- Support self-restriction and teetotaler preferences.
- Track alcohol purchases.
- Reduce alcohol misuse.
- Assist government policy through data analytics.

4. Stakeholders

Primary Stakeholders

- Consumers
- TASMAC Shop Operators
- TASMAC Administration

Secondary Stakeholders

- Government Departments
- Healthcare Professionals
- De-addiction Centres
- Family Members/Caretakers

5. Target Users

- Consumers purchasing alcohol
- TASMAC Sales Staff

- Government Officials
- Health Authorities
- System Administrators

6. Functional Requirements

Consumer Module

- Aadhaar Registration
- OTP Login
- Profile Creation
- Set Daily/Weekly/Monthly Drinking Limit
- Select "I am a Teetotaler"
- Enable Self-Restriction Mode
- Purchase History
- Health Alerts

Shop Operator Module

- Verify Customer
- Check Eligibility
- Record Purchase
- Display Remaining Purchase Limit

Administrator Module

- Manage Users
- Manage TASMACHOPs
- Generate Reports
- View Analytics Dashboard
- Monitor Consumption Trends

Government Dashboard

- District-wise Reports
- Age Group Analysis
- Consumption Statistics
- Revenue Reports
- Public Health Analytics

Doctor Dashboard

- Anonymous Health Statistics
- Addiction Trend Analysis
- Awareness Recommendations
- Rehabilitation Support Data

7. Non-Functional Requirements

- Secure Authentication

- Fast Performance
- Responsive Design
- Data Encryption
- High Availability
- Privacy Protection
- Scalable Architecture

8. Innovative Features

Personal Consumption Profile

Consumers can:

- Set monthly alcohol limit.
- Set weekly alcohol limit.
- Set daily alcohol limit.
- Activate Self Restriction.
- Choose "I am a Teetotaler."
- Receive Health Notifications.

Health-Based Regulation

System follows responsible drinking awareness.

Examples:

Beer:

330–355 ml = 1 Standard Drink

Wine:

140–150 ml = 1 Standard Drink

Spirits:

30–45 ml = 1 Standard Drink

Maximum Reference Limit

- 2 Standard Drinks per Day
- 14 Standard Drinks per Week

If limits are exceeded:

- Warning Notification
- Health Risk Alert
- Self Restriction Recommendation

9. Data Collection

Real-world survey data will be collected from:

Consumers

- Drinking habits
- Purchase frequency
- Awareness

Caretakers

- Family impact
- Financial impact

Government Officials

- Regulations
- Policy Suggestions

Doctors

- Health effects
- Addiction patterns
- Prevention strategies

10. Technology Stack

Frontend

- HTML
- CSS
- JavaScript
- React.js

Backend

- Node.js
- Express.js

Database

- MySQL

Authentication

- OTP Verification
- Aadhaar Verification (where legally permitted)

Hosting

- Cloud Platform

11. System Workflow

Analytics & Reports

12. Expected Benefits

- Prevent underage purchases.
- Promote responsible drinking.
- Reduce alcohol misuse.
- Improve transparency.
- Support healthcare awareness.
- Help government policy making.

- Enable data-driven decisions.

13. Future Enhancements

- AI-based Addiction Risk Prediction
- Health Recommendation System
- Mobile Application
- Smart QR Code Verification
- Integration with Rehabilitation Centres
- Predictive Analytics Dashboard

14. Success Metrics

- Reduction in excessive alcohol purchases
- Increase in users adopting self-restriction
- Improved monitoring accuracy
- Higher consumer awareness
- Better government reporting efficiency

15. Conclusion

The Smart TASMACH Consumer Regulation System is a digital governance solution that combines identity verification, responsible consumption features, and analytics to improve alcohol sales monitoring. By empowering consumers with self-regulation tools and providing valuable insights to government and healthcare stakeholders, the system aims to support safer and more transparent alcohol distribution while promoting public health. Note for your college presentation: Since Aadhaar is protected under Indian regulations, present Aadhaar verification as a conceptual feature or one

that would require authorization from the relevant government authorities. For your prototype, use sample or mock identity data rather than real Aadhaar information.
